

THE NORDMIN GROUP ANNOUNCES THE ESTABLISHMENT OF NORDMIN CONSTRUCTORS INC.

Published on February 6, 2018

The Nordmin Group (Nordmin) announces the creation of Nordmin Constructors Inc. (Constructors), a Company focused on providing full EPC solutions to the Mining and Industrial sectors across North America and around the world. Constructors joins Nordmin Engineering Ltd. (Engineering) within the Group.

Constructors is the manifestation of Engineering's existing efforts in the industry, but expanded to include full construction management and general contracting services to streamline projects and improve efficiency. Now operating as a sister Company rather than a division of Nordmin Engineering, Nordmin Constructors will move forward in undertaking major capital projects providing Engineering, Procurement and Construction services, coordinating all aspects of the project from Construction through Commissioning.

"Nordmin Engineering Ltd. has provided EPC and EPCM services for the last many years, stopping short of operating as a full General Contractor. However, with changes in the industry it is clear to us that the Mining and Industrial Sectors need a Company like Nordmin Constructors that can efficiently execute projects from start to finish, maintaining focus, safety, budget and schedule. Our focus is efficiency and fit for project solutions, not maximizing our hours and fees on a project." Says Chris Dougherty, Chairman of the Nordmin Group.

Nordmin Constructors Inc. will be led by Mining Industry veteran Micheal Mayhew, formerly Vice-President, Operations with AMC Contractors and Dumas Mining. With 25 years or more of experience in Construction and Contracting around the world, Mike's leadership will prove invaluable in guiding the Company going forward.

"This is a very exciting development for me and for the Nordmin Group. We are building on the 14 years of effort at Nordmin Engineering and have many opportunities before us to make Nordmin Constructors a major player and provide the Mining and Industrial Sectors with a positive alternative to "big project team" thinking that is both safe and efficient." Says Micheal Mayhew, President of Nordmin Constructors Inc.

The Nordmin Group of Companies is based in Thunder Bay, Ontario, with offices in Sudbury, Ontario, Kamloops, British Columbia and Salt Lake City, Utah. The Group provides Engineering, Construction and Operational support to the Mining and Industrial sectors worldwide. Visit www.nordmin.com,
